

Arvus International Limited

25th January 2023 – Newsletter #01

Welcome To Our Newsletter

The intent of these simple newsletters is to let you know of our product updates, offers, inside information of our upcoming products and anything Arvus related prior to public announcements. We have an exciting suite of world-unique audio products to be released over the coming few years and we are excited to share our company evolution with you.

H2-4D Successfully Launched

After a year of beta-testing, we finally released of the H2-4D in October with the shipping of hundreds of full production devices to our patient clients. Outside of a few firmware bugs the overall response has been fantastic. **A full review is currently being done and should be released in March**

An Expanding Team - <https://www.arvus.com/team.html>

In 2022 Arvus we proudly set up our Arvus Advisors team. Each individual brings critical thinking and tremendous market insight to help us grow our company by ensuring each product continually evolves to meet the ever increasing needs of the market.

Updated Firmware - <https://www.arvus.com/firmware.html>

We have now updated our firmware to support **Dolby Vision**, plus included **additional GUI features**:

- **MUTE** – on/off
- **GLOBAL VOLUME** – up/down +/- 1dB
- **STANBY** – on/off

These features were implemented to enable remote control via our upcoming **integrations with Crestron** and **Q-Sys** systems. We expect to have the Crestron integration done and released by February.

Production / Stock Status

- **AES-2H** has good stock reserves
- **HDMI-2A** has good stock reserves
- **H2-4D** – less than a dozen units currently in stock – **Next production run completed by May**
- **H1-D** –Beta production orders open in Q2

Announcing **H1-D** (H2-4D's smaller sibling)

- **HDMI to Dante / AES67 only.**
- **Small** (similar formfactor to the Apple4K)
- **Price** well under **USD3k including freight**
- Performance and GUI will be identical to H2-4D.
- **eARC / HDMI Pass-through** will be supported.
- **Samples ready for testing around April**
- Aiming for the first **Beta Run to be completed December 2023.**
- Given the rate of Atmos adoption across in the entire audio market, we can see that this unit could be a great seller.
- Further information to be released in coming newsletters.

Arvus now on LinkedIn - <https://www.linkedin.com/company/arvus-international>

Thank you all for your interest and support through 2022.

Feel free to contact myself if you have any thoughts or suggestions on any of the above.

Kind regards,

Matthew A. Simmons
